

Engineering

The very highest levels of technical expertise and quality assurance make PEP a natural partner for the engineering sector.

Ours is one of the most comprehensive services in the UK, ideally suiting the breadth of requirements typically found within the engineering sector and allowing us to work in areas as diverse as petro-chemicals, building management control systems, pumps and filtration, heating and refrigeration.

Services typically used by the manufacturing, engineering and industrial sectors include:

- In-house tooling
- Insert moulding
- 2 shot moulding
- Technical moulding of high-performance engineering polymers (PPS, PVDF, PEEK and more)
- ATEX conductivity moulding
- Filtration moulding
- Full product assembly and testing
- Chrome plating
- RFI shielding
- Conductive coatings
- ISO/ TS16949:2009 accreditation
- Pad printing
- Ultrasonic welding
