Medical

PEP is a successful supplier to the global medical market, with an established customer base including names such as Smiths Medical, Cardinal Health, Spacelabs, GE Healthcare, Aspen Medical, De Soutter Medical and many more.

From pre-production engineering to full production, PEP delivers a huge range of parts and products for the medical sector, from ophthalmic needle hubs and microvials to components for compressed air ventilators, peak flow meters, peristaltic pumps, surgical drills, cutters and more.

Our services for the medical sector features:

- Full pre-production services including in-house prototype tooling, soft tools for short production runs, product validation and the supply of stereolithography models (SLAs)
- Insert moulding
- 2 shot moulding
- Plastic machining
- A full range of value-added processes for enhanced efficiency and cost advantage
- High or low volume production
- Delivery on Kanban or JIT basis to suit customer
- Technical moulding in medical grade materials such as Polysulfone, PVDF & PEEK
- Anti-microbial plastics
